- ★ **Fundamentals of Digital Marketing** — Google

Music · Sports · Cooking · Travel · Art · Theatre

MISSION_STATEMENT

Digital specialist with a hybrid profile, I combine the technical rigor of Front-end development (HTML5, CSS3, JavaScript, ReactJS, PHP, WordPress) with expertise in UX/UI design (Figma, prototyping, Design System) and 3D principles (3DS Max). A graduate of a Professional Bachelor's in Digital Careers at EiSINe (2026), I am now pursuing a Master MAALSI at CESI Reims on a work-study program at SynAppco (web applications and websites), after a Web & Multimedia DUT at ESTM. I have built experience across freelance missions, web and design internships, and a strong customer relations background (Glovo/INTELCIA). My approach balances functionality and aesthetics: I create high-performing, ergonomic and creative digital solutions, from mockup to production. Rigorous, versatile and user-focused, I am committed to optimizing user experience and deploying innovative interfaces.

QUEST_LOG

Web Developer (Work-study)
SynAppco — October 2026 — Present

- Development of web applications and websites, from integration to production
- Built the company showcase website (React, Vite, brand guidelines)
